# Sports Hub Successes

## The story so far...

Working group established, short term funding secured and contractor in place to operate the facility and deliver sport / fitness

Growing membership using the gym facilities (c40 members) and 600 users per month

Links with community groups and local business helping to strengthen hub and increase use

Ongoing social media, banners, flyers, offers and events have helped to spread the word

## Sports Hub Challenges

### The story so far...

Facility has a previous history of poor promotion and usage decline

The Sports Hub project is a long term project that has to find ways to be largely self sufficient

High operating costs from the outset with the need for constant monitoring of finance

BUT, everyone has learned a lot and medium to long term planning is now progressing

## **2020 / 2021 Projects / Plans**

- ▶ Contract tendering process for management of the facility and delivery of sports and activity provision
- ▶ Online booking system and income generated = self sustainable facility
- ▶ Development of the sport and activity provision (new activities and taster sessions / targeted approaches – older people, parents of children in activities).

## **2021 / 2023 Projects / Plans**

- ▶ Continued use of the sports facilities, with new residents participating within the hub
- ▶ Co-ordination of sport and recreation development
- ▶ Integration with Active Schools and other after school service providers
- ▶ Expand links to health services which would benefit from the use of facilities
